20th June 2000

Dear Sirs

As agreed with yourselves, we should submit a yearly report on the effectiveness of the Non-Slip application outlining the following:

*Number of slip accidents reported,
Number of days lost from slip accidents
Number of slip accidents requiring hospital treatment
Area's that have been treated and are subjectively giving cause for concern.*

During the first 12 months there have been no reported slip incidents, this is a reduction of 31 reported from the proceeding year. The number of workdays lost attributed to slip incidents last year has been eliminated from 185 days.

To date the effectiveness of the Non-Slip treatment has been 100 per cent. The staff and management have all recognised that the treatment has far reaching beneficial effects in everyone's working life.

We trust our second year will be equally safe

Yours sincerely

Fred Madders
